

9 Powerful Probiotics, In One Simple Sachet

Developed with the help of Maastricht University Medical Centre, Netherlands, ActivHealth Multibiotics harnesses nine probiotic strains to endow your insides with infection-fighting superpowers.

Feeling a little queasy? Perhaps there's been a disturbance in your gut flora. The average person's body contains up to 2 kilograms of bacteria, not all of it bad. In fact, most of the bacteria keep you healthy by digesting sugars, producing essential vitamins and even fighting off bad bacteria on your behalf.

So when something goes wrong with them, sometimes you can literally feel it in your guts. You might get signs of intestinal distress, like diarrhoea for example, or bloating, abdominal pain, and sometimes even nausea.

And if things continue to go badly for the valiant germs in your guts, you might become more vulnerable to opportunistic infections, such as food poisoning. In the long run, you'll even fall sick more often.

Restore Balance With ActivHealth Multibiotics

ActivHealth Multibiotics is a multiple-probiotic supplement that deploys the unique disease-fighting powers

of nine different strains of probiotic bacteria. Developed with the help of Maastricht University Medical Centre in Netherlands, each sachet of ActivHealth Multibiotics helps:

- ✓ Keep bad microbes out of your guts by competing for nutrients and adhesion sites;
- ✓ Stimulate your body's natural production of antimicrobial agents;
- ✓ Increase the synergistic benefits of existing bacteria; and
- ✓ Reduce diarrhoea, bloating, and abdominal pain, then speed up recovery

Powder Power

ActivHealth Multibiotics comes in powder form, which is why we could put so many probiotics strains into one product. Each sachet's aluminum foil protects the helpful bacteria until they are ready for deployment. And powder sachets can be stored at room temperature, so each sachet has a longer shelf life and contains more

bacteria right when you need it.

ActivHealth Multibiotics also contains no calories or lactose, unlike cultured milk drinks, so it is suitable for people who are watching their calories, diabetic or lactose-intolerant. Simply open the sachet and mix its contents with any beverage to reactivate the bacteria, any time, anywhere.

With 9 strains of clinically-proven, powerful probiotics in each sachet, ActivHealth Multibiotics delivers a premium blend of quality, quantity and diversity to your guts. In short, Probiotic Power!

Who needs ActivHealth Multibiotics?

- You have signs of intestinal distress (bloating, diarrhoea, abdominal pain, etc.)
- You are on a course of antibiotics (which kills all germs, not just bad ones)
- You have experienced poor appetite or diet (gut bacteria need to eat too, or else they fade away)
- You feel constipated or have stomach ulcers
- You are pregnant (and want to pass good gut health onto your newborn)

Features

- ✓ Superior stability & efficacy
- ✓ No artificial preservatives
- ✓ Clinically proven effective
- ✓ Developed with Maastricht University Medical Centre, Netherlands

Available at Guardian, Unity, Hospital pharmacies, Robinsons, JL and independent pharmacies.
